## NITROCHARGER SPORT SHOCK ABSORBERS

**LARGE BORE 35MM TWIN TUBE DESIGN** - Allows greater oil volume for cooling and sustained valving performance and strong 1.6mm outer tube construction protects the vital internal components from damage.

**LARGE 18MM HARDENED CHROME PISTON ROD** - Strong enough to handle any load or harsh conditions expected from your 4x4.

**TRIPLE LIP CHECK VALVE OIL SEAL – MK2** - The latest technology in oil seal design – physically larger with quantum improvements in durability, oil and gas retention with much greater resistance to heat so it keeps working under the harshest conditions.

**TEFLON IMPREGNATED LOW FRICTION ROD GUIDE** - The latest refinement in rod guide design further reduces heat build up and maintains performance.

**TEFLON INFUSED BRONZE ROD GUIDE SLIP RING** - A new component that maintains consistent and uniform performance by providing a tight and uniform fit between the piston rod and rod guide.

**MULTI DEFLECTIVE DISC VALVING SYSTEM** - A unique and new valving system that features multiple disc valving control at the base of the shock and on both sides of the piston rod. This allows the OME engineers more valving options for better ride quality and handling control.

**35MM HIGH FLOW TEFLON BANDED PISTON** - New low friction design has less restrictive oil flow through the piston, reduces heat build up and aeration of the oil that leads to fade.

**VEHICLE SPECIFIC VALVING** - OME shock absorber's performance stand head and shoulders over its competitors because many hours of OME engineering valving work has been put into each and every shock absorber to ensure our customers get the best ride and handling their vehicle can have.

**POLYETHYLENE DIRT SHIELD** - Impact resistant, polyethylene dirt shield provides additional protection from stone chips and off road debris.

**NITROGEN GAS** – Increases the temperature operating range and improves oil flow through the valving, ensuring optimum performance.

**SUPPLEMENTARY WELDS** - For strength and reliability all mounts have supplementary welds.

**WARRANTY** - 3 year/60,000km warranty.

## NITROCHARGER SHOCK ABSORBERS

**GIANT 18MM CHROMED SHAFT** - Indestructible for Australia's rugged off roading. Induction hardened then hard chromed to a superfine finish.

**NITROGEN GAS** - The gas pressure keeps the oil cohesive under all situations.

**TWIN TUBE DESIGN** - 33% thicker outer tube insures that rocks do not damage internal operating components. This design also allows for a greater volume of oil which keeps shock cooler.

**35MM SEVEN STAGE COMPRESSION VALVE** - Delivers all the subtleties of compression rates for the best ride and handling.

**CHECK VALVE SEAL** - The latest in seal technology, this shaft seal significantly improves gas retention whilst offering excellent longevity.

**GLACIER BUSH** - A Teflon coated rod guide bush - significantly reduces heat build up in the rod guide area, developed from the Emu's off road racing programme.

**GIANT 35MM TEFLON BANDED PISTON** - A new four stage coil sprung rebound valve system to control vehicle bounce.

**SUPPLEMENTARY WELDS** - On all mounting eyes & pins for maximum shock absorber mount strength.

**STONEGUARD** - Protects oil seal and piston rod against stone and dirt damage.

**WARRANTY** - 2 year/40,000km warranty.

## COIL SPRINGS

**X5K MICRO-ALLOYED SPRING STEEL** - New generation high strength spring steel grade designed to withstand higher operating stresses with superior resistance to sag and improved toughness and corrosion fatigue properties.

**SHOT PEENED** - To reduce stress, which greatly enhances spring life.

**DOUBLE SCRAGGED** - To eliminate spring sag.

**VARIABLE & CONSTANT RATE** - Designs used to obtain optimum ride comfort and load carrying capabilities

## STEERING STABILISERS

**COIL SPRUNG 9 STAGE VALVING** - For optimum performance.

**35MM PISTON & BORE** - Greater oil volume giving better damper performance.

**TWIN TUBE DESIGN** - Protects the internal components against stone damage.

**STEEL STONEGUARD** - Protects the piston rod against stone damage.

**FOAM CELL** - Keeps the oil at the valving to prevent fade.

**ORIGINAL MOUNTS** - All mounts are of similar design to original stabilisers for ease of fitment.

## LEAF SPRINGS

**FLAT AXLE SEAT AREA** - Lowers spring stress whilst retaining spring free camber height. Unique to most OME springs.

**ANTI FRICTION INTER LEAF LINERS** - Used where applicable to reduce friction between spring leaves giving better ride comfort and increased spring life.

**SHOT PEENED** - On the tension side of all leaves to double spring life.

**DRAW TAPERED & DIAMOND CUT LEAVES** - For reduced interleaf friction and improved load distribution in the load bearing area.

**GRAPHITE COATED** - For further reduced friction.

**MILITARY WRAPPED** - For extra safety (where fitment permits).

**LOOSE CLAMPED** - For smooth & quiet operation.

## URETHANE BUSHES - LEAF SPRING

**PREMIUM GRADE** - Not all bushes are the same - OME bushes are precision moulded in captive moulds to ensure exact tolerances for long bush life.

**SPLINES** - Ensures the best fit by taking up irregularities in spring eyes.

**UNIQUE OME DESIGN** - Clever lip seal and shoulder design prevents dirt penetrating between bush shoulder and shackle face.

## GREASABLE SHACKLES

**REDUCED WEAR** - Greasable shackles reduce shackle pin deterioration, increase bush life, enables easy maintenance and improve ride and handling.

**ANTI INVERSION FACILITY** - Built in feature on all LandCruiser greasable shackles.

**SERVICING** - Simple & effective.

## Terminologies & Explanations

*Please note most suspension development has been carried out on Australian specification models.*

*Therefore, some differences may exist between the same model in another country. Overseas customers will need to make allowances for these possible differences.*

Supplying all items shown on suspension selection charts will ensure the system can be fitted, however, there will be vehicles which will not require all items, eg. Trimming kits, caster kits, all U bolts shown, etc. Actual, individual vehicle requirements can only be determined when the suspension system is fitted.

**GVM - GROSS VEHICLE MASS:** Set by the vehicle manufacturer and is determined by brake, axle, differential and tyre specifications. Exceeding GVM ratings can have legal and safety implications and is not recommended.

**LOAD RATING - FRONT:** Weights shown are maximum permissible loads with regard to accessories fitted, eg. Bull bar, winch, dual battery, etc.

**LOAD RATING:** The explanations below indicates the passenger and load weights that will provide optimum ride and handling.

**REAR:**

LIGHT LOAD: Full passenger load with luggage weights up to 150kg.

MEDIUM LOAD: Full passenger load with luggage weight varying from 200kg to 350kg.

CONSTANT LOAD: The minimum constant load shown on selection chart is required for optimum spring performance.

Please note: These loads are approximate only. Refer to individual vehicle selection for load specifications.

**LIFT HEIGHT:** Is shown as a guide only and equates to the amount of lift over the vehicle's original ride height. This amount can vary from vehicle to vehicle.

**OE:** Original Equipment, as supplied by the manufacturer of the vehicle.

**SHOCK ABSORBERS:** Where two part numbers are given for the same application the part with the asterisk (\*) indicates the shock absorber with the firmer ride.

**SPRING BUSH:** OME polyurethane spring eye bushes on installation must only be greased in the bore and on the flange area and regularly thereafter with OME polyurethane grease.

**STEERING STABILISER:** Designed as a larger capacity replacement for the OE part and incorporates 50/50 neutral valving.

**CASTER KIT:** The OMECA77B, CALR1 and CALR2 kits consist of 4 eccentric bushes which are pressed into the leading arms of the vehicle. This will induce positive caster into the front geometry.

**LEAF SPRINGS:** A & B springs can be used to compensate for uneven vehicle weight distribution. Springs marked "A" have a greater camber height than springs marked 'B'. 'A' type springs are generally fitted to the driver's side and 'B' springs to the passenger side.

**COIL SPRINGS:** A & B springs are used to compensate for uneven vehicle weight distribution. 'A' type springs are generally higher in free high than the 'B' spring. Individual coil specifications are listed in the back of this publication.

**GEARBOX PACKER KIT:** Designed to space down the gearbox cross member from the chassis to reduce tail shaft flange angle thereby reducing driveline vibration.

**GREASABLE SHACKLES:** Replacement for original shackles allow easy regular greasing of polyurethane spring eye bushes.

**TRIM PACKERS:** The prime purpose of a trim packer is to correct slight vehicle leaning.

**VEHICLES WITH LEAF SPRINGS UNDER SLUNG:** Trim packer when fitted will reduce suspension height.

**VEHICLES WITH LEAF SPRINGS OVER SLUNG:** Trim packer when fitted will increase suspension height.

**VEHICLES WITH COIL SPRINGS:** Polyurethane trim packer main purpose is to correct slight vehicle trimming problems and will increase ride height when fitted.

# NITROCHARGER SPORT SELECTION

## SELECTION ADVICE

Where there is a choice of part numbers it is important the right selection is made with consideration given to type of spring rates and customer applications.

### Firm Valving

The firm part number should be selected whenever heavy rate springs are fitted, as the valving has been specifically developed to control the higher spring rates. The firmer valving will provide better control when cornering, while also preventing axle bounce over rough roads.

If a softer valved Selection is fitted with a heavy rate spring the vehicle's rebound handling will be reduced. This will be evident by axle bounce over rough roads, dipping under braking or cornering and wallowing over undulating roads.

### Soft Valving

Valved specifically for light to medium rate springs. Most suitable for customers wanting a comfortable ride and regularly carry light to medium loads. Under full GVM load a slight amount of body roll during cornering and highway speed manoeuvring can occur.

## A RECOMMENDATION FOR CUSTOMERS BUYING 4 REPLACEMENT SHOCK ABSORBERS

By the time a customer has decided to replace the old and well used original shock absorbers there is every chance that the original springs are also ready for replacement.

It should be explained to the customer that if their springs are sagged and tired that this would cause the shock absorbers to work a lot harder.

Therefore, the life expectancy of the shock absorbers will be considerably shortened and when loaded ride and handling qualities will also be reduced.

**REMEMBER: A good set of shock absorbers will not overcome a bad set of springs.**

NOTES: \*first part number has firmer valving.

1. Shock lower body stone guards are recommended fitment to rear shocks to protect against severe stone peppering encountered on loose road surfaces. OME661 (suit LandCruiser 80 & 100 Series only) OME660 (all other models).
2. It may be necessary to slightly increase the clearance in the front wishbone to allow the shock absorber to fit. Do not modify the shock absorber.
3. FK18 rear sway bar extension bracket for LWB models and FK24 for SWB models are **mandatory** fitment with Nitrochargers to prevent damage to sway bar due to increased wheel droop.
4. FK22 support brackets must be installed to upper shock mounting brackets on late 1996 on models manufactured in Thailand.
5. OME Struts can only be installed with OME Coil Springs.
6. OMESD35 will suit D21 models only.
7. 60043 is 20mm longer and must only be installed to right hand side.
8. OMEB11 bush kit is required to convert lower 19mm bush to 16mm ID.
9. OMESD40 will only fit left hand drive models.
10. FK16 20mm bump stop spacer kit **mandatory** fitment.

Note: Replacement Nitrocharger Sport Dirt Shields: 384006170, 384006210, 384006250 & 384006290.

The last 3 numbers of the part number indicates the length of the dirt shield.

The replacement Dirt Shield Part Number for Individual Sport Shocks are listed in the Nitrocharger Sport Specifications on page 99.

# NITROCHARGERS & STEERING STABILISERS

## SHOCK ABSORBER SELECTION ADVICE

Where there is a choice of part numbers it is important the right selection is made with consideration given to type of spring rates and customer applications.

### Firm Valving

The firm part number should be selected whenever heavy rate springs are fitted, as the valving has been specifically developed to control the higher spring rates. The firmer valving will provide better control when cornering, while also preventing axle bounce over rough roads.

If a softer valved Selection is fitted with a heavy rate spring the vehicle's rebound handling will be reduced. This will be evident by axle bounce over rough roads, dipping under braking or cornering and wallowing over undulating roads.

### Soft Valving

Valved specifically for light to medium rate springs. Most suitable for customers wanting a comfortable ride and regularly carry light to medium loads. Under full GVM load a slight amount of body roll during cornering and highway speed manoeuvring can occur.

## A CAUTION FOR CUSTOMERS BUYING 4 REPLACEMENT SHOCK ABSORBERS

By the time a customer has decided to replace the old and well used original shock absorbers there is every chance that the original springs are also ready for replacement.

It should be explained to the customer that if their springs are sagged and tired that this would cause the shock absorbers to work a lot harder.

Therefore, the life expectancy of the shock absorbers will be considerably shortened and when loaded ride and handling qualities will also be reduced.

**REMEMBER: A good set of shock absorbers will not overcome a bad set of springs.**

<b>VOLKSWAGON</b>				
1985 to 1990	Syncro 4x4	N38S	N37	

NOTES: \*first part number has firmer valving.

1. 1983 and on wide track CJ Jeeps require bush kit OMEB27 for the front lower mount and all Cherokee wagons and Mahindra lower front and rear mounts.
2. Shock lower body stone guards are recommended fitment to rear shocks to protect against severe stone peppering encountered on loose road surfaces. OME661 (suit LandCruiser 80 & 100 Series only) OME660 (all other models).
3. 1981 on F100 and Bronco require bush kit OMEB27 on bottom rear mount.
4. Ford dual shocks. N43 fitted in front of N52F.
5. It may be necessary to slightly increase the clearance in the front wishbone to allow the shock absorber to fit. Do not modify the shock absorber.
6. FK16 20mm bump stop spacer kit **mandatory** fitment.
7. FK18 rear sway bar extension bracket for LWB models and FK24 for SWB models are **mandatory** fitment with Nitrochargers to prevent damage to sway bar due to increased wheel droop.
8. N75E and N68E are 20mm longer and must only be installed to right hand side.
9. FK22 support brackets must be installed to upper shock mounting brackets on late 1996 on models manufactured in Thailand.
10. N208S can only be installed with OME Coil Springs.
11. N179 suits models with single rear shock set up. Models with twin rear shocks require N179 fitment rear of axle, N180 front of axle, also fitment of OME660 stone shields are recommended on the N180.
12. OMESD40 will only fit left hand drive models.
13. To obtain maximum ride quality improvement it is recommended that an OME replacement stabiliser bar (OMESTAB1) be fitted.
14. Models with ABS will require an SMP638 ABS bracket kit.
15. OMEB11 bush kit is required to convert lower 19mm bush to 16mm ID.
16. OMESD35 will suit D21 models only.
17. Only suitable for models equipped with original steering damper.
18. Shocks are the same length as OE.
19. OME030 is shorter than OME029 and must be used with OE coils to ensure coils remain entrapped.

Note: Replacement dust boot part numbers: Nitrocharger OME412422

**NOTES:**

- Refer to pages 120 - 121 for fitting instructions.

# LTR REMOTE CANISTERS

## LTR SHOCKS

YEAR	VEHICLE DESCRIPTION	FRONT	REAR
LAND ROVER			
91 to 99	Discovery Series I	LTR04F R&L	LTR04R
84 on	Defender & County 90, 110 & 130	LTR05F	LTR05R R&L <sup>4</sup>
NISSAN			
2/00 on	Patrol Y61 (GU) Series II SWB & Wagon	LTR07F	LTR07R <sup>1</sup>
97 to 1/00	Patrol Y61 (GU) Series I Wagon & SWB	LTR07F	LTR07R <sup>1</sup>
97 on	Patrol Y61 (GU) Cab Chassis (All Coil Springs)	LTR07F	LTR07R <sup>1</sup>
To 8/89	Patrol Y60 (GQ) Wagon & SWB	LTR02F	LTR02R
9/89 on	Patrol Y60 (GQ) Wagon, SWB & Cab Chassis	LTR02F	LTR02R
TOYOTA			
3/98 on	LandCruiser 100 Series (IFS)	LTR06F	LTR06R R&L <sup>2</sup>
3/98 on	LandCruiser 105 Series (Front Live Axle)	LTR01F	LTR03R R&L <sup>2</sup>
4/90 to 98	LandCruiser 80 Series	LTR01F	LTR01R R&L <sup>2</sup>
99 to 2006	LandCruiser 78 & 79 Series (6 cylinder models only)	LTR09F	LTR09R R&L
9/97 to 04	HiLux LN172, LN167, KZN165, RZN174 & RZN169 (IFS)	LTR08FL/FR	LTR08RL/RR <sup>3</sup>

### NOTES:

1. FK18 rear sway bar extension bracket for all models without detachable sway bar and FK24 for all models with detachable sway bar are mandatory fitment with Nitrochargers to prevent damage to sway bar due to increased wheel droop.
2. Fitment of a rear stone flap kit is mandatory to the control arms to prevent stone damage to the shock absorber. OME662 suits models with 34mm diameter. OME664 suits models with 43mm diameter.
3. Fitment of OME663 stone flap kit is **mandatory** to prevent damage to piston rod from stone peppering.
4. LTR05R suits early model defenders where the fuel pump is not mounted inside of the right rear mud guard.

Note:      Replacement dust boot part numbers: LTR OME512422 - Large  
 Replacement dust boot part numbers: LTR OME412422 - Small

## GASSING REMOTE CANISTER SHOCK ABSORBERS

The only recommended gas to use in LTR shock absorbers is Nitrogen. A Schrader valve, part number 2755, from Schrader Automotive Inc is required to guarantee correct pressure is reached. When using a Schrader valve to gas your LTR Shock absorber first set the pressure gauge to the required pressure. Attach the Schrader valve to the air fitting at the end of the remote canister. Gas the canister until the shock absorber shaft is fully extended, hold gas pressure for 30 seconds, release Schrader valve and remove.

Note: This can be done for you by your Old Man Emu Stockist.

Important: Gassing of your LTR shock absorber should be carried out before fitment to the vehicle. If LTRs are already fitted the vehicle's suspension should be at full extension before gassing.

## MINIMUM/MAXIMUM GAS PRESSURE

On Road/Off Road	40-80psi (2.8 - 5.5 BAR)
Competition	80-100psi (5.5 - 6.9 BAR)
An increase in gas pressure firms up ride quality but will not alter ride height	

## MAINTENANCE

**The following checks need to be carried out as part of regular vehicle maintenance.**

**To ensure maximum cooling of your LTR shock absorber inspect the shock absorber body and canister for any mud and debris build up and clean if necessary**

**Check that the polyurethane boot is securely fastened in place and that it is not damaged. If the boot is found to be detached thoroughly clean the shock absorber shaft and inside the boot before reattaching it.**

**Ensure all polyurethane bushes, locating washers and nuts are in good condition and securely fastened.**

**To ensure maximum shock absorber performance check gas pressure every 20,000km**

# COMPETITION SHOCK & SPRING SELECTION

## WARNING

### WARRANTY EXCLUSION DISCLAIMER

Due to the unusual component design requirements and the severe nature of competition usage, the normal Old Man Emu product warranty conditions do not apply to any products listed on this page.

NISSAN PATROL Y60 & Y61 MODELS						
COMPETITION SHOCKS AND COIL SPRINGS						
Lift	Location	Coil Spring Part No.	Coil Rate	Coil Length (mm)		Shock Part No.

#### IMPORTANT:

The products listed in this selection chart are deemed by Old Man Emu to be suitable only for Off Road use and their legality for public road use should be certified by the relevant Registration Authority.

Modifications and replacement of other associated components will be required.

*Lift increase is approximate and based on standard vehicle weights.*

# COMPETITION SHOCK & SPRING SELECTION

## WARNING WARRANTY EXCLUSION DISCLAIMER

Due to the unusual component design requirements and the severe nature of competition usage, the normal Old Man Emu product warranty conditions do not apply to any products listed on this page.

### Nitrocharger L Series

Vehicle	Front	Open	Closed	Rear	Open	Closed
Jeep JK	1N196L	693	404	1N198L	706	422
Jeep XJ	60052L	678	392	60053L	622	366
Jeep YJ	N33L	748	422	N34L	622	366

LandCruiser 80, 100	60070L	667	381	60071L	673	387

### REMARKS:

- 1 Not supplied with Mounting Kit. Use OE Kit.

### Selection for individual vehicles depends on:

1. Open and closed length requirements
2. Vehicle front and rear weight distribution

The table below lists suggested selection for various competition vehicle types

Vehicle Type	Front	Rear
Buggies	OME007: 1 per side	OME007: 1 per side = Multiple fitment required
		*OME018: 2 per side
Baja	OME007: 1 per side	OME007: 2 per side OME018: 2 per side
4WD	- Large - Small	N76: 4 per side N76: 3 per side N76: 2 per side N76: 2 per side

\*HANDLING VARIATION CAN BE CHANGED BY REMOVING ONE SHOCK

### Shock Characteristics & Specifications

Part No	Top Mount	Lower Mount	Open Length	Closed Length	Characteristic
OME007	Large Eye	Large Eye	600mm	359mm	Compression
OME018	Large Eye	Large Eye	585mm	359mm	Rebound
N76	Large Eye	Large Eye	680mm	408mm	Rebound

### Warranty Implications

The fitter selling these shocks must inform the customer there is no warranty due to the severe nature of competition racing. The fitter must also note on the customer's receipt "racing application no warranty applies". This will prevent any future misunderstanding.

NITROCHARGER	N36		
SPRING BUSH KIT	OE		
U BOLTS	OMEU60 OMEU57	4	
GEARBOX PACKER KIT	XJGK01	1	

**REMARKS:**

- 1 OMEU60 suits Dana 35 type differential - Australian models. OMEU57 suits AMC 8 $\frac{1}{4}$  type differential.
- 2 Trimming requirement greater than 10mm use A/A fitment. Where near level rake is desired B/B fitment should be used. D22XL extra leaf can be fitted to CS034RA/B and CS035RA/B for heavier constant load carrying ability.  
NB: Models fitted with OE Up Country Suspension pack will only be raised by 20mm.
- 3 OMEJGF10 front coil packer can be used for trimming or extra lift purposes, using no more than 1 packer.
- 4 Fit XJGK01 gearbox packer kit should a driveline vibration occur.
- 5 OMESD40 will only fit left hand drive models.

## JEEP CHEROKEE/LIBERTY KK

<i>Estimated Lift: 40 mm</i>			
SPRING: MEDIUM LOAD	CS042R	2	
NITROCHARGER	N17	2	

**REMARKS:**

- 1 Raise or lower front end clearance and trim vehicle by adjusting front torsion bars.  
Important: A minimum of 60mm of droop must be maintained.
- 2 OE spring bushes are required to fit CS042R springs. D10XL extra leaf should be fitted when a constant 200kg plus load is carried.

## FORD F250 &amp; F350 2005 - 2008 ALL MODELS

<b>FRONT</b>	V8 DIESEL: COIL SPRING		
	PART NUMBER	QTY	UNIT PRICE \$

U BOLTS - WITH OVERLOAD LEAF	OMEU67	4	
FITTING KIT	FK31	3	1
	FK35		
SPACER KIT	OMESK1	3	1

**REMARKS:**

- 1 Springs are supplied with bushes fitted.  
Where the OE spring has an overload leaf fitted, it must be replaced with a TSXL01 and the CS048R original centre bolt replaced by a UCB10, the original spacing block must also be re-fitted using U Bolts OMEU67.
- 2 To maintain 60mm lift for loads over constant 600 KGS and add D27XL Extra Leaf.
- 3 Fitment of Driveline Spacer Kit FK31 for Crew Cab or FK35 for Xtra Cab is recommended to reduce possible driveline vibration. If required, additional spacing down of the centre bearing can be achieved by using an OMESK1 Spacer kit.
- 4 Fitment of a FK36 Caster Correction Kit will provide approximately 3.5 to 4.0 degrees of extra caster. It is advisable to have a Front End Alignment carried out to determine if a FK36 kit is required

	FK35			FK35		
FITTING KIT	OME660 [2]	1		OME660 [2]	1	

**REMARKS:**

- 1 APRF250 Adjustable Panhard Rod must be fitted to allow original axle location to be restored, bushes are supplied in Rod.
- 2 For models with dual shock fitment N179 must be fitted rear of the axle, as it is longer than the N180. OME660 stone shields are also a recommended fitment to the rear shocks.
- 3 To help maintain 60mm lift, add one D27XL Extra Leaf for every 400 KGS carried over 600 KGS.
- 4 Fitment of FK31 to Crew Cab or FK35 to Xtra Cab models is recommended to reduce possible driveline vibration.
- 5 As the CS048R has a different spring camber, compared to the original spring, the overload leaf must be replaced with a TSXL01. The Original spacing block must be refitted. Springs are supplied with bushing.
- 6 Springs are supplied with bushing.

### REMARKS:

- 1 Raise or lower front end clearance and trim vehicle by adjusting front torsion bars.  
Torsion Bar 303004 suit models from 8/88 to 3/92 only.  
Important: A minimum of 60mm of droop must be maintained.
- 2 60009 / 60063 / N88: Suits 11/86 to 3/92 models and requires OMEB11 bush kit to convert lower bush from 19mm to 16mm ID.  
60064 / 60032 / N42 / N89: Suits models '82 to 10/86 (no bush kit required).
- 3 Where the OE spring has 4 leaves OMEU59A U Bolts are required.
- 4 FK14 Anti Inversion kit must be fitted if greasable shackles are not fitted.

ANTI INVERSION KIT	FK26	1	
GREASABLE SHACKLE KIT	OMEGS13	1	

**REMARKS:**

- 1 Raise or lower front end clearance and trim vehicle by adjusting front torsion bars.

Important: A minimum of 60mm of droop must be maintained.

It has been found, due to vehicle manufacturing tolerances, that in some cases front shock absorbers may contact the steering arm when on full lock. Fitter should check for this and where required a small indentation should be made to the body of the shock absorber.

303012 Torsion Bars have a lighter rate than OE and improve ride comfort for vehicles with no front accessory weight.

Due to their heavy rate, the OE Torsion Bars are suitable for Vehicles with front accessory weight.

- 2 Fit N65 when installing 303012 Torsion Bar to Petrol Models and N150 for OE Torsion Bars.

- 3 CS062R and CS063R can be installed to 4x2 Models.

## REMARKS:

- 1 Caution: Due to altered gearbox mounts on models after 1998 any lift above OE ride height may cause front driveline vibration that can only be rectified by fitment of front Double Cardan joints.  
Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if caster kit is required.  
CALR1 suits 38mm wide control arms. CALR2 suits 44mm wide control arms.
- 2 OME752 coil has a softer spring than OE coil. This is to provide improved ride quality with light loads only  
OE springs are designated as medium load springs.
- 3 Original inner helper coil, where fitted, must be re-installed with OME Coils.
- 4 8mm Steel Coil Seat Packer, refer to selection chart supplied with packer.  
Important: To prevent possible over stressing of the spring, only one packer can be fitted under each coil seat

NITROCHARGER	*N44 / N46	2		

## REMARKS:

- 1** Caution: Due to altered gearbox mounts on models after 1998 any lift above OE ride height may cause front driveline vibration that can only be rectified by fitment of front Double Cardan joints.

Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if caster kit is required. CALR1 suits 38mm wide control arms. CALR2 suits 44mm wide control arms.

TRIM PACKER	Do not use Packers		
SWAY BAR EXT KIT	FK18	[3]	1
	FK24		

**REMARKS:**

- 1 Coil trim packers may be required to trim vehicles.  
Packers must be installed to the bottom of front coils.
- 2 OMECA77B caster kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required. FK25 may be required for some European models when caster kit is fitted.
- 3 FK18: Rear sway bar extension bracket is mandatory fitment to models with fixed sway bar to prevent damage to sway bar when suspension is at full extension. FK24 suits models with detachable sway bar.
- 4 Special Note: Due to limited clearance between tailshaft and chassis cross member, OME does not recommend fitment of gear box packers.
- 5 OMESD11 steering damper fits all models up to 1/2000. OMESD01 fits 2/2000 models on.  
To verify correct fitment for individual vehicles compare OE Mounts with Steering Stabilisers Specifications on Page 117.

**REMARKS:**

- 1 OMESD01 fits 2/2000 on models.  
OMESD11 fits all models to 1/2000.
- 2 OMECA77B caster kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required.
- 3 FK25 Oil Pan Kits must be installed when fitting GQGK02 Gear Box Packer Kit.  
When installing caster kit OMECA77B an additional FK25 oil pan kit is required.
- 4 FK18: Rear sway bar extension bracket is mandatory fitment to models with fixed sway bar to prevent damage to sway bar when suspension is at full extension. FK24 suits models with detachable sway bar.
- 5 GQGK02 Gear Box Packer Kit is designed to space down the gear box cross member from the chassis to reduce tail shaft flange angle thereby reducing driveline vibration. In some cases 2 kits may be required.

NITROCHARGER	N29		
FITTING KIT	FK18	[3]	1
TRIM PACKER	Do not use Packers		

## REMARKS:

- 1 OMECA77B caster kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required.
- 2 Coil trim packers may be required to trim vehicle to a maximum of 15mm.  
Packers must be installed to the bottom on front coil.
- 3 FK18 rear sway bar extension bracket is mandatory fitment to prevent damage to sway bar when suspension is at full extension.

SPRING BUSH KIT	OMESB2 [3]	2	
	OMESB29		
U BOLTS	OMEU58	4	

**REMARKS:**

- 1 Models with P40 4 litre engine require CS011FA / B springs.

Individual vehicles fitted with A / B fitment may experience a pronounced trimming problem to right hand side.

In these cases fitment of an XL leaf to the right hand side will correct problem.

- 2 Front spring bushes:

Early model (round headlight) require  
OMESB28 and OMESB29.

Late model (square headlight) require  
OMESB31 and OMESB29.

- 3 OME bush kits must be used to enable springs to be fitted.

- 4 Front U bolt : OMEU56 fits to right hand side.  
OMEU57 fits to left hand side.

1 Raise or lower front end clearance and trim vehicle by adjusting front torsion bars.

Important: A minimum of 60mm of droop must be maintained.

2 It may be necessary to slightly increase the clearance in the front wishbone to allow shock absorber to fit. Do not modify shock absorber.

3 For Constant 400kg loads, add D18XL to CS031R.

## REMARKS:

- 1 Fitment of XL Leaf D20XL is recommended for weight in excess of 26kg on diesel model & 75 kg on petrol model.
- 2 Front: LHS: OMEU60 x 2, RHS: OMEU61B x 2 Required when fitting CS013FA/B  
Rear: OMEU60 x 4 Required when fitting CS039R.
- 3 OMESD30 can be fitted to models which have an OE Steering Damper.
- 4 Fitment of XL Leaf D21XL is recommended for LWB models with constant 100kg rear weight or OE hard top.

STONE GUARD KIT	OME661	3	1

**SELECTION HINTS:**

The OME spring range has been developed to give owners the ability to reduce the very pronounced 75mm of rear to front rake of the original Toyota suspension. By carefully matching the OME front and rear springs the rake can be reduced to be between 20mm and 50mm.

**NB: Where 20mm lift rear coils are selected they must be matched to 50mm lift front springs.**

**REMARKS:**

- 1 OME Coils and strut can only be installed together due to different winding of the lower coil end to suit the OME coil seat. They are not compatible with the OE Equipment. Due to the nature of the KDSS, models fitted with KDSS may experience a characteristic 10mm to 15mm lean to the front right hand side.
- 2 To maintain ride height when front accessory weight exceed 100 KGS, OME95PF5 coil packer should be installed, each OME95PF5 will increase ride height by 10mm.
- 3 OME661 lower shock stone guards are recommended fitment for protection against stone damage.

STONE GUARD KIT	OME661	3	1	OME661	3	1

### REMARKS:

- 1 Raise or lower front end clearance and trim vehicle by adjusting front torsion bars.  
It is important that a minimum of 60mm of droop is maintained to prevent topping out of the front shock absorbers. 303001 suits V8 models. 303002 suits Turbo Diesel models.  
NB: In some Middle Eastern Countries, 6 Cylinder Petrol LandCruiser 100 Series (IFS) use the longer turbo diesel torsion bars.
- 2 Packers must be installed on top of coils.
- 3 OME661 or OME662 (suits 40mm diameter control arms) lower shock mount stone guard is recommended fitment to rear shocks to protect against severe stone peppering encountered on loose road surfaces.
- 4 Original rear rake is 60mm approximately with OE coil rates of 145lbs/in or 25.5N/mm.  
Customers wishing to lower the rear height but increase the load carrying ability can select from:  
OME866 - Reduces OE height by 10mm (rates 240 - 300lbs/in, 42 - 52.5N/mm).  
OME862 - Reduces OE height by 30mm (rates 240lbs/in, 42N/mm).
- 5 Due to the common problem of the lower control arm cracking when driven under hard conditions, the fitment of a FK27 lower control arm reinforcing bracket kit is strongly recommended.

	OMEKP7	1		OMEKP7	1	
U BOLTS	OMEU59B	4		OMEU59B	4	
SWAY BAR BRACKET KIT	NOT REQUIRED			FK34	3	1

**REMARKS:**

- 1 OMECA77B caster kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required.
- 2 There is a difference between the shackles on Single Cab models and Troop Carrier models.  
Be sure to select OME bush kits carefully:  
OMESB101: Use on original shackles & pins for 79 Series Models from 07/2009 on.  
OMESB84: Use on original shackles & pins for 79 Series Models to 06/2009.  
OMESB85: Use for all models when installing OME greasable shackles & pins.  
OMESB86: Use for Troop Carrier models when original shackles & pins are used.
- 3 FK34 Sway Bar Extension Bracket Kit must be installed to prevent damage to Sway Bar mounts, due to increased suspension travel
- 4 OMESD24 suits pre 2007 models (open length 651mm).  
OMESD47 suits 2007on models (open length 750mm).
- 5 Should the front drive shaft contact the sway bar when the suspension is at full droop, use FK19 Spacer Kit to pack the sway bar down.

ANTI INVERSION KIT	FK08 [2]	1	

**REMARKS:**

- 1 Vehicles with no front accessory weight will require the removal of the 4th leaf from the top of the spring stack.  
This is to maintain good shackle angle by not allowing the bump stop measurement to exceed 100mm.
- 2 Shackles: FK08 anti inversion kit is mandatory fitment front and rear if greasable shackles are not fitted.  
Note: Spring Caster Wedge OMECW2 (2° Caster Wedges) may be required to restore positive caster angle.  
Front end alignment check will indicate required adjustment.
- 3 There can be 2 spigot sizes in the rear fixed end pins on 75 Series LandCruisers.  
Check for correct size before ordering greasable pins. Part numbers are:  
50mm spigot = OMEGP2.  
51mm spigot = OMEGP4.

	FK13		

**REMARKS:**

- 1 A/A spring fitment may be needed on some vehicles for trimming purposes.
- 2 Petrol HiLux may require an FK03 (saddle correction plates) if the spring seats are distorted.  
FK10 must be fitted to all Diesel & Petrol models used off road. Refer OME Technical & Fitting Manual.
- 3 OMEU52 is required when fitting OME springs to stop the U bolt contacting the drag link.  
Refer OME Technical & Fitting Manual.
- 4 A trim packer may be required to trim vehicle. Only to be used on rear springs.
- 5 Post 1984 vehicles have a 19mm mounting pin and suit shock part numbers: N85, N94, 60062 and 60065.  
Pre 1984 vehicles have a 16mm mounting pin and suit shock part numbers: N89, N95, 60032 and 60064.
- 6 If greasable shackles are not fitted anti inversion kits must be fitted.  
FK09 fits all pre 1984 models.  
FK13 fits all 1985 models on.
- 7 To provide correct shackle angle, 1985 - 89 automatic 4 Runner models require the 3rd leaf to be removed to reduce spring rate.

## HILUX PRE 1997 EXTRA CAB & DUAL CAB SR5 IFS & REAR LEAF MODELS

<b>FRONT</b>	<b>PETROL &amp; DIESEL ENGINES</b>		
	<b>PART NUMBER</b>	<b>QTY</b>	<b>UNIT PRICE \$</b>
TORSION BARS: 50 KGS	303003	[1]	1
NITROCHARGER	N98	2	
STEERING DAMPER	OMESD33	1	

<b>REAR</b>	<b>ALL MODELS</b>		
	<b>PART NUMBER</b>	<b>QTY</b>	<b>UNIT PRICE \$</b>
SPRING: MEDIUM LOAD	CS019R	2

D36XL	-	CS059R

\* FK01 U Bolt Thread Spacer Kit required on all Cab Chassis models

### REMOVING A LEAF:

In general terms, to reduce a springs rate remove the third leaf from the top of the spring.  
Except if the third leaf is fitted with a spring clip, in this case remove the fourth leaf.

**X5K MICRO-ALLOYED SPRING STEEL** is a new generation high strength spring steel grade designed to withstand higher operating stresses with superior resistance to sag and improved toughness and corrosion fatigue properties. These properties are enhanced by additions of Silicon, Chromium, Vanadium Nickel along with lower Carbon than conventional spring steel grades.

# TORSION BAR FITTING HINTS

## TORSION BAR REMOVAL

1. Before removing the original Torsion bars, the vehicle's front and rear rim to guard measurements must be taken and noted down, as per image A.  
**Image A:** Ride height is measured from the bottom of the rim to the wheel arch vertically through the centre of the hub.
2. Using either a hoist or axle stands, raise the vehicle so that the front suspension is off the ground.
3. **Image B:** After cleaning and lubricating the two adjusting bolts, in the torsion bar anchor arms, measure and note the amount of thread protruding through the lock nut.
4. Using only hand tools loosen and remove the adjusting bolts.
5. Remove torsion bar and anchor arm assembly. Slide anchor arm and dust covers (if applicable) off the torsion bars.
6. Thoroughly clean the anchor arms, adjusting bolts and dust covers.

## TORSION BAR INSTALLATION

7. **Image C:** As each OME torsion bar is preset they are marked (LH) and (RH) and because of this they must only be installed as marked.  
**As viewed from the driver's seat:**      **LH** -to the left hand side.  
   **RH** -to the right hand side.
8. **Image D:** Where there is a master spline on the torsion bars (shown in white) on installation they must be aligned to the anchor arms. Where the torsion bars have the same spline sizes at each end, the torsion bar can be installed with either end to the front.
9. Slide the dust cover (if applicable) over the Old Man Emu torsion bars and apply grease to all splines and threads.
10. Install the torsion bar and align the anchor arm so the adjusting bolt is just protruding through the anchor nut. If required, the torsion bar can be rotated one spline at a time to adjust the position of the anchor arm.
11. Tighten the adjusting bolts so the same amount of thread, as noted in step 3, protrudes. Install dust covers.
12. Lower the vehicle back onto its wheels and drive a short distance to settle the front suspension.

# TORSION BAR FITTING HINTS

## TORSION BAR ADJUSTMENT

NB - All torsion bar adjustments must be done with the vehicle raised off the ground and the front suspension hanging. Do NOT adjust the torsion bars with the vehicle wheels on the ground.

13. **Image E:** Park the vehicle on level ground and measure the vehicle's rim to guard measurements.
14. Use the torsion bar anchor arm adjusting bolt to raise or lower the vehicle's ride height, also to trim the vehicle from side to side, to the desired height.

## FRONT SUSPENSION DROOP CHECK

15. To maintain good drive shaft, ball joint angles and to stop constant front suspension top out, it is important to check after adjusting the vehicle's ride height, that the vehicle has enough front wheel droop.

**Generally, a vehicle must have a minimum of 50 to 70mm of downward wheel travel (droop)**

16. **Image E:** Front suspension droop is checked by taking the vehicle's front rim to guard measurement, while the wheels are on the ground and noting it down.  
**Image F:** Then raise the front until the wheels are off the ground and take another rim to guard measurement and note it down.  
By subtracting the E image measurement from the F image measurement, the amount of droop will be obtained. Carry out any adjustment that may be required.
17. All vehicles will require a headlight, front end alignment, and tyre pressure check after the fitment of new torsion bars.

# STRUT CARTRIDGE FITMENT INSTRUCTIONS

## Installation Procedure:

- 1 Using a hammer, tap the steel bump cap upward.
- 2 Remove and discard the bump cap.
- 3 Shown is the tube cutter used in these instructions. This tube cutter is available through ridgid tools ([www.ridgid.com](http://www.ridgid.com)) Model No. 152. Catalog No. 31642. Capacity 1/4 - 2 5/8 (6-66mm).

- 4 Using the tube cutter, cut 20-25mm off the top of the strut tube as shown.
- 5 Remove the shaft assembly and discard.
- 6 Drain all the remaining oil from the strut tube.

- 7 Remove the paint from around the top of the strut using abrasive paper.
- 8 Thread the locking ring into the strut adaptor leaving a 3mm gap as shown.
- 9 Place the OME Cartridge into the strut tube.

- 10 Slide the adaptor and locking ring over the cartridge & strut tube.
- 11 Push the adaptor all the way down until the locking ring is resting on the cartridge.
- 12 Whilst holding down the adaptor, place 3 small tack welds evenly around the base of the adaptor

# STRUT CARTRIDGE FITMENT INSTRUCTIONS

- 13 Small tack weld shown
- 14 Remove the cartridge and locking ring
- 15 Place 3 evenly spaced 20 mm welds around the adaptor.  
**THIS OPERATION MUST BE DONE BY A COMPETENT WELDER**

- 16 Welded adaptor shown.
- 17 Paint the adaptor and welds black.
- 18 Add 15cc of oil to the strut tube.  
**Note:** Oil type is not important. ie. Original oil, engine oil, gearbox oil.

- 19 Place the cartridge all the way into the strut then lift out to check oil level.
- 20 The oil level should be between 50 - 100mm up the cartridge.
- 21 After checking oil level; reinstall the cartridge by firmly tightening the locking ring.  
The strut can now be reassembled and installed into the vehicle.

# RECOMMENDED FITTING TIMES

## COIL SPRINGS SYSTEMS

All Coil Spring Models (Except Land Rovers)	2.0 hours
Fitment of 4 Shock Absorbers & 4 OME coil springs	
Land Rover All Coil Spring Models	2.5 hours
Fitment of all the above plus additional time to remove front shock absorber towers	
Torsion Bar Front with Rear Coil Suspension	2.0 hours
Fitment of 4 Shock Absorbers, 2 OME coil springs & front torsion bar adjustment	
Coil Front with Rear Leaf Suspension	3.5 hours
Fitment of 4 Shock Absorbers, 2 OME coil springs & 2 OME Leaf springs	
Coil Over Front Strut with Rear Coil Suspension	3.0 hours
Fitment of 2 Shock Absorbers, 2 OME struts & 4 OME coil springs	
Coil over Front Strut with Leaf Rear Springs	4.0 hours
Fitment of 2 Shock Absorbers, 2 Struts, 2 Coils & 2 Leaf Springs	

## LEAF SPRING SYSTEMS

All Leaf Spring Models (Except HiLux)	5.0 hours
Fitment of 4 Shock Absorbers, 4 OME Leaf Springs, and U bolts and spring bushes as required	
Toyota HiLux All Leaf Spring Models	6.0 hours
Fitment of all the above plus additional work required to strengthen front spring seat mount	
Front Torsion Bar with Rear Leaf Spring Models	3.0 hours
Fitment of 4 Shock Absorbers, 2 OME rear leaf springs, U bolts, spring bushes and front torsion bar adjustment	

## CARTRIDGE REPLACEMENT

Additional work required to install cartridge per strut	0.5 hours
---	-----------

## TORSION BARS

Remove and replace a set of Bars (no removal complications)	1.5 hours
Remove and replace a set of Bars (removal complications eg. OE splines corroded)	2.5 hours

## MISCELLANEOUS

Caster kits	2.0 hours
Steering stabilisers	0.5 hours
Greasable shackles (complete vehicle set)	2.0 hours

## FRONT END WHEEL ALIGNMENT ADJUSTMENTS

Price
Live axle front end
Independent Front End

The above fitting times are only a guide, and additional time may be involved due to vehicle modifications or pre-existing accessories which can interfere with the fitment of the suspension.

# **WARRANTY**

## **WARRANTY STATEMENT - WRITTEN POLICY & COMMENT**

---

**Nitrocharger Sport - 36 months / 60,000km**  
**All other products - 24 months / 40,000km**

---

### **FITTING WARRANTY:**

In the event that your Suspension Equipment (the Kit) is fitted by a Licensed OME Fitter displaying the Licensed OME Fitter sign, ARB Corporation Limited, Old Man Emu Div. (OME) warrants:

- (a) That the Licensed OME Fitter has undergone a training course under the supervision of OME in the proper selection, fitting and testing of suspension equipment;
- (b) That the Licensed OME Fitter will select, fit and test the Kit in a proper and workmanlike manner.

### **PRODUCT WARRANTY:**

1. OME warrants its products against defects in workmanship and material which caused it to perform below the specifications contained in the current OME fitting manual, for a period of twenty four (24) months or 40,000 kilometres, whichever comes first, from the date of retail sale, to the extent that OME will replace with a new or reconditioned part any component part the workmanship or materials of which are found to be defective according to such specifications.

2. On instructions from OME, any spring or shock absorber which the customer claims to be defective should be returned, together with all mounting parts, to OME or to any Licensed OME Fitter accompanied by proof of purchase and a description of the claimed defect. The out-of-pocket cost of returning such part will be borne by OME in the event that the warranty claim is sustained.

3. This Warranty does not apply to, and OME excludes liability under this warranty (but see Clause 5 below) for, damage to or wear of any component part:

- (a) Caused by improper or negligent use
- (b) Caused by installation or use on modified vehicles or on vehicles other than those recommended by OME.
- (c) Caused by any racing or competition use if such use does not have the prior approval of OME.
- (d) Occurring after 500 kilometres of use unless the safety check recommended by OME has taken place.
- (e) Occurring by use of a vehicle loaded in excess of the Gross Vehicle Mass stated in respect of the vehicle by the relevant manufacturer.
- (f) Where installation is not performed by a Licensed OME Fitter.
- (g) Where used in excessively severe conditions such as mining and some government departments.

4. This warranty and all other warranties which by law may be negated shall be so negated if a suspension Kit is not fitted as a suspension system comprising entirely of OME parts.

5. The benefits conferred by this warranty are in addition to the rights and remedies which the customer has under the Trade Practices Act and similar state and territory laws in respect of the Kit and services provided with respect to the Kit, by a Licensed OME Fitter or any other person.

### **COMMENT:**

By way of comment only, a correctly selected OME Kit, when not affected by the matters set out in Clause 3 above and fitted to a vehicle in good condition, without any individual peculiarities or uses, should have satisfactory suspension travel and rake, and not more than 10mm variation in bump stop clearances left to right hand side. The entire contents of the Technical and Fitting Manual are relevant to this comment. Refer to the OME Technical & Fitting manual for additional comment on warranty.
